

Say hello to Natede

Let's begin

Natural Air Purifier

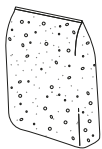

Natede works with the natural cleaning power of plants to purify your home. You can find a list of the plants that work the best in the support section on www.vitesy.com Once you have your favorite plant, you're ready to begin.

What's in the box?

In the box, you will find the following components.

Assembly time: 15 minutes

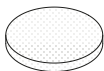

Clay

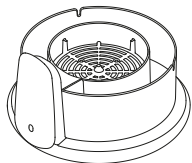

Self-Watering Spout

Outer Pot

Ceramic Filter

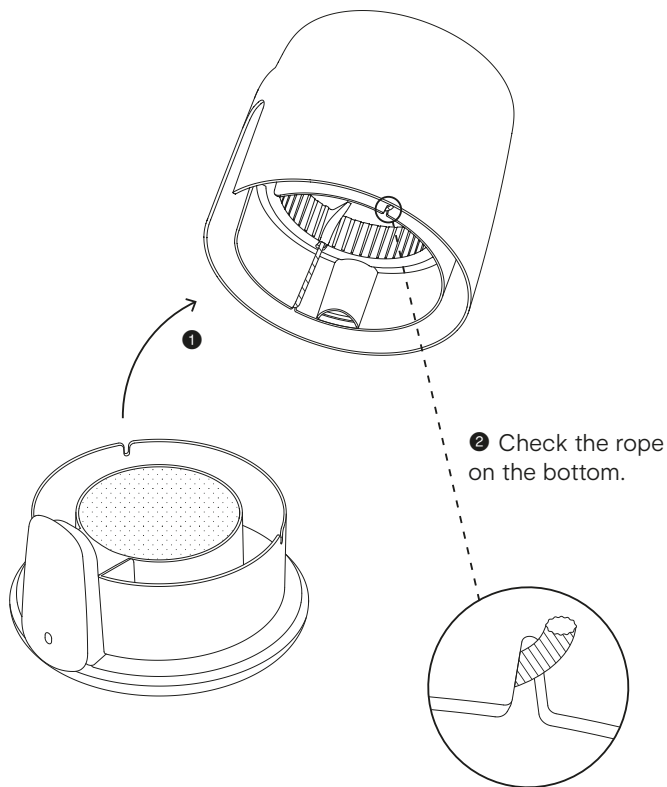

Base and Water Tank

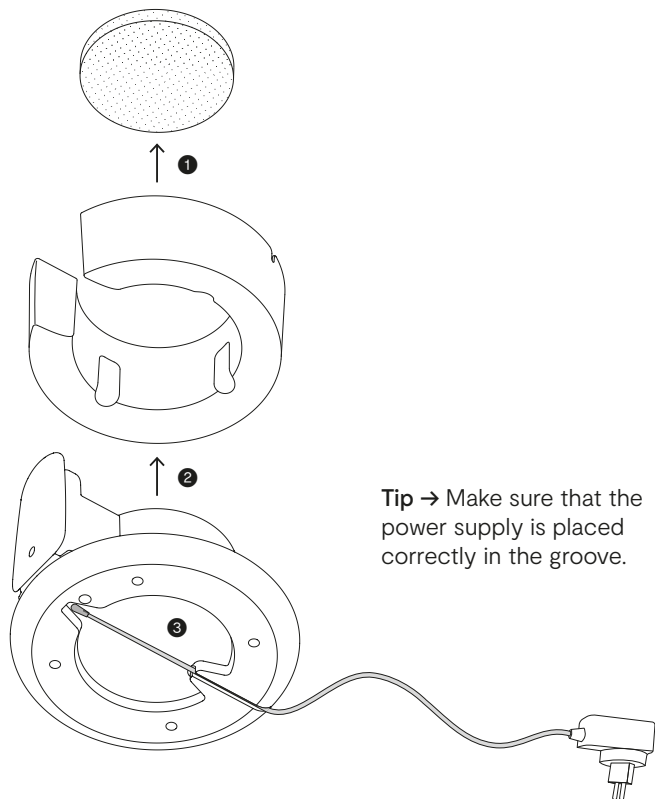

Power Supply

1 → check the rope

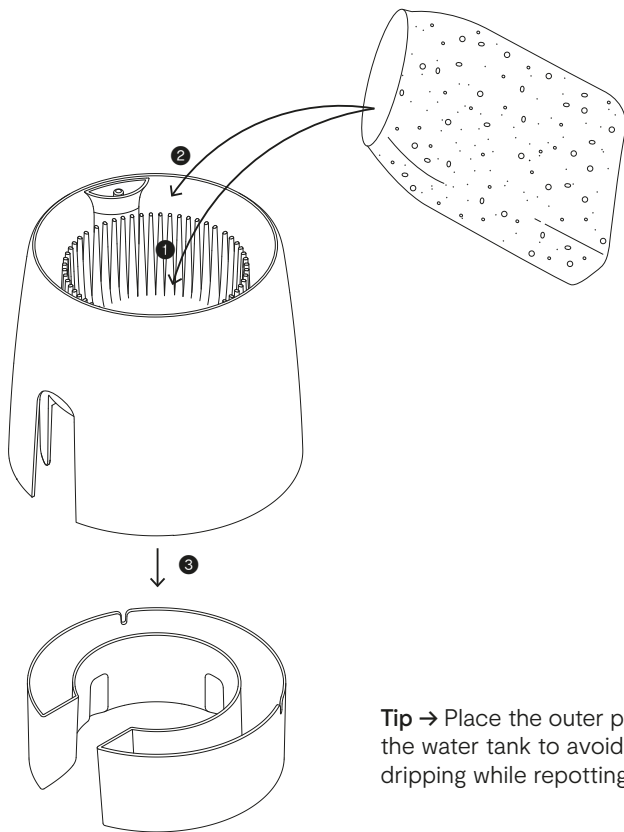

Remove the outer pot from the base ① and then ensure that the rope is placed correctly in the groove at the bottom of the pot ②.

2 → attach the power cord

Carefully remove the ceramic filter ① and the water tank ② from the base, turn it upside down and connect the power cord ③.

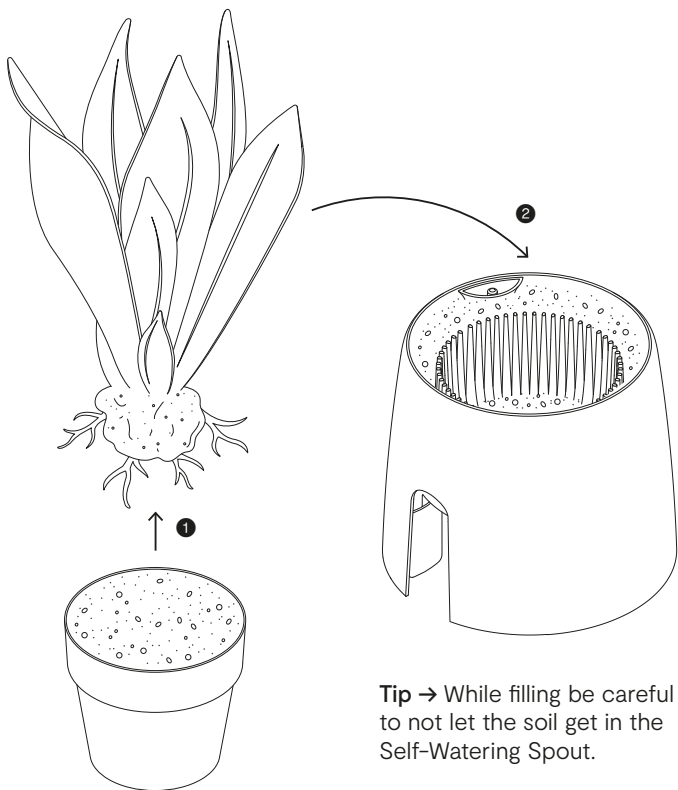

3 → place a layer of clay

Tip → Place the outer pot on the water tank to avoid soil dripping while repotting ③.

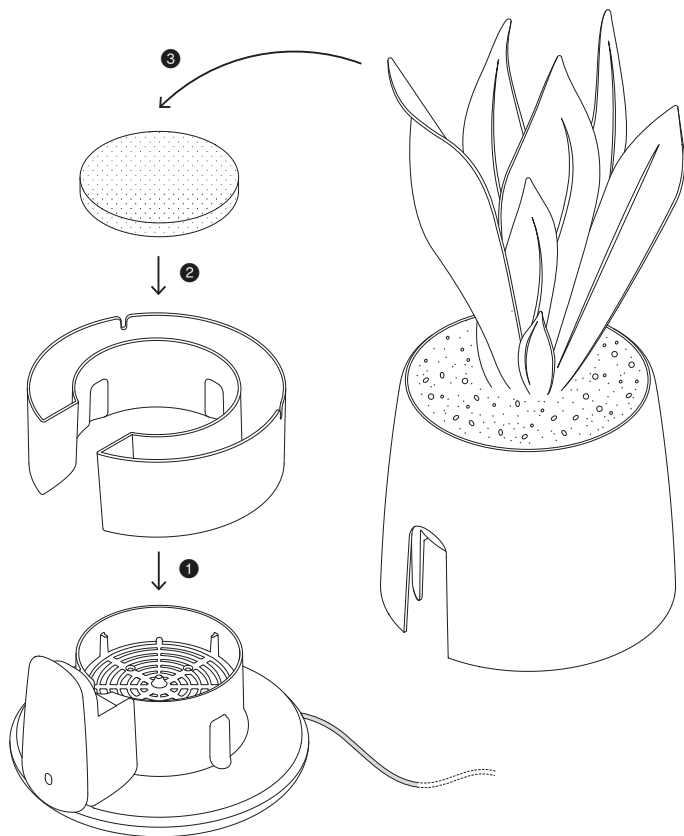

Cover the bottom of the inner basket with a layer of clay ①.
Fill the space between the pot and the inner basket up to the top of the tips with clay ②.

4 → pot your plant

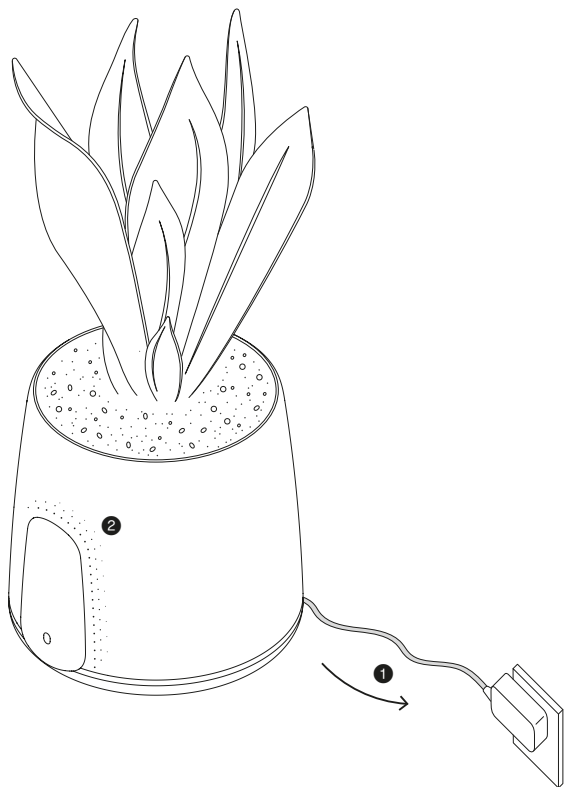

Take your plant and gently untangle its roots ①. Place the plant in the inner basket, fill it with soil and water it until the soil is moist ②. Cover the top of the soil with another layer of clay.

5 → assemble the pieces

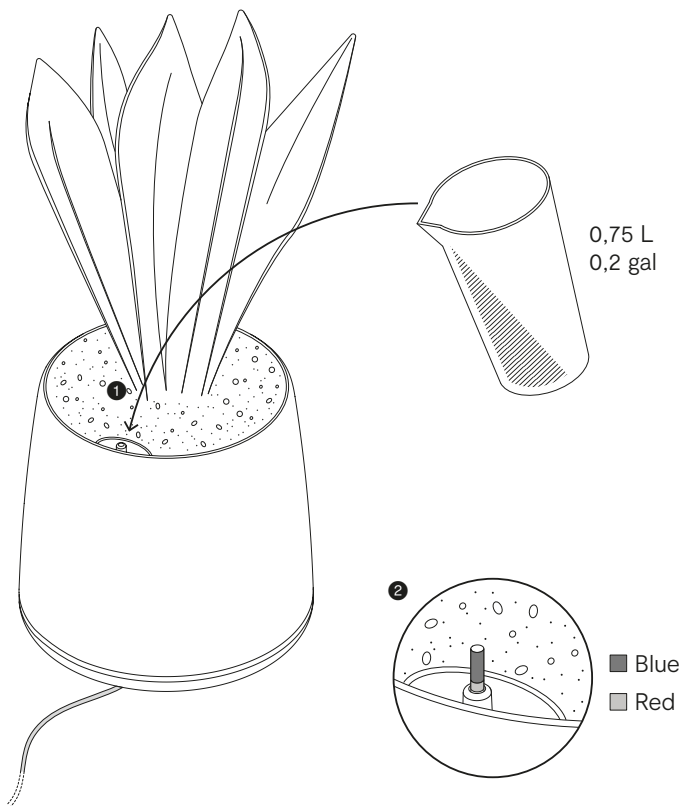

Clean the water tank and insert it ① with the ceramic filter ② on top of the grid. Then put the outer pot on the base ③.

6 → plug it in _____

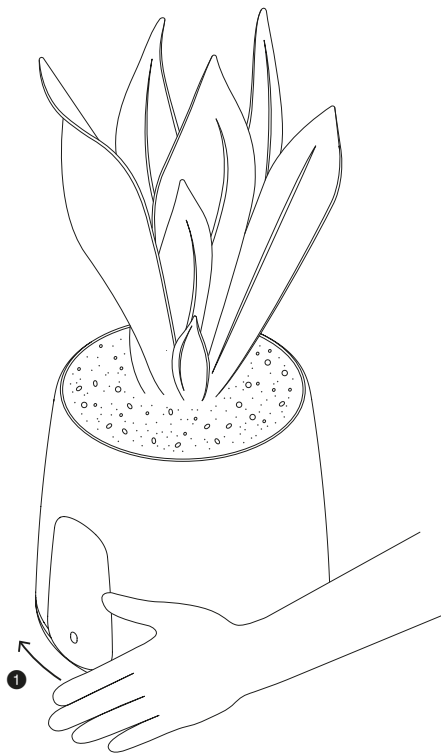

Now it's time to plug the adaptor into an outlet ①. Watch for the LED light on your Natede's smart interface to blink twice ②.

7 → put water in the system

Fill the tank slowly through the little spout ①. Pause every few seconds to allow the float to rise and indicate the water level. When the red line is visible, the tank is full ②.

8 → start it up

Hold your hand in front of the little eye on your Natede's smart interface ① and wait for magic to start. Natede will begin to make your home air cleaner, safer and healthier.
